Legal & General Investment Management America, Inc. (LGIMA) announced today in its Pension Fiscal Fitness Monitor, a quarterly estimate of the change in health of a typical US corporate defined benefit pension plan, that pension funding ratios fell over the second quarter of 2017. LGIMA estimates the average funding ratio fell from 83.9% to 82.8% over the quarter.

The Pension Fiscal Fitness Monitor showed funded ratios decreased over the quarter as pension assets grew less than pension liabilities. Global equity markets increased by 4.45% and the S&P 500 increased 3.09%. Plan discount rates fell 23 basis points, as Treasury rates decreased by 15 basis points and credit spreads tightened by 8 basis points. Overall liabilities for the average plan rose 4.55%, while plan assets with a traditional "60/40" asset allocation increased 3.24%, resulting in a funding ratio decrease of 1.05%.

LGIMA's Head of Solutions Strategy, Don Andrews, said: "We estimate that funded ratio levels for the typical plan with a traditional asset allocation decreased primarily due to assets failing to keep pace with pension liabilities. While equity markets rallied, lower interest rates and tighter credit spreads resulted in an even stronger quarter for liability values, which contributed negatively to the funded ratio."

Andrews added, "We are seeing continued interest from many plan sponsors looking to manage funding ratio outcomes and minimize volatility. In particular, plan sponsors are considering customized LDI strategies such as liability benchmarking, completion management, and option based hedging strategies."

The Pension Fiscal Fitness Monitor assumes a typical liability profile and 60% global equity/40% aggregate bond ("60/40") investment strategy, and incorporates data from LGIMA research, Bank of America Merrill Lynch and Bloomberg.

### Notes to editors:

**Notes to editors:** Legal & General Investment Management America, Inc. (LGIMA) is a Chicago-based registered investment advisor specializing in active fixed income, liability driven investment (LDI) and index strategies for the US institutional market. LGIMA was founded in 2006 as a wholly-owned subsidiary of Legal & General Investment Management (Holdings) Ltd. (LGIM(H)), which also owns its affiliates Legal & General Investment Management Ltd. and LGIM International Ltd. Legal & General's worldwide assets under management are approximately \$790 billion. In May 2014, LGIMA became a wholly owned subsidiary of Legal & General Investment Management US (Holdings) (LGIMUS(H)) which is wholly owned by LGIM(H).

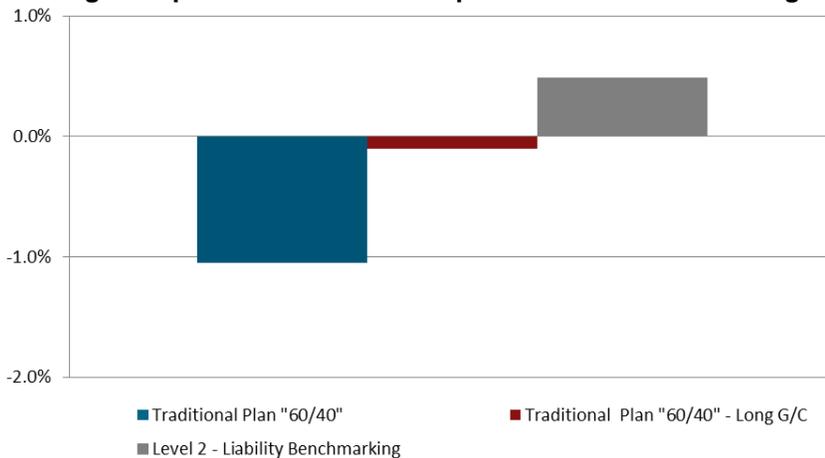

**Pension funded status market summary:**

- Liability values increased over the quarter, outperforming asset portfolios (composed of a 60/40 mix of global equities and aggregate bonds), leading to a decrease in funding ratios
- Equity markets increased, with global equities up 4.45% and the S&P 500 up 3.09%
- Average pension discount rate decreased 23 basis points over the second quarter; Treasury rates decreased by 15 basis points while credit spreads tightened 8 basis points

| Funded status risk | 2 <sup>nd</sup> quarter 2017 |
|--------------------|------------------------------|
| Equities           | ↑                            |
| Interest rates     | ↓                            |
| Credit spreads     | ↓                            |

**Funding ratio performance of select pension investment strategies (over the quarter):**

**The Pension Fiscal Fitness Monitor measures the historical market-related funding ratio performance of the traditional “60/40” investment strategy and highlights a few different approaches to implementation.**

For each of the three approaches to implementation, we analyze how funding ratio performance would have changed for two different levels of equity exposure – 60% and 40%. We define two different LDI approaches as follows:

- Traditional: Allocating 60% to equities and 40% to either aggregate fixed income or Long G/C
- Level 2 LDI: Custom liability benchmark and derivative overlay designed within a total portfolio context
  - Level 2 implementation shown for comparison purposes and is chosen based upon the funding ratio of “a typical US corporate defined benefit pension plan” as of the beginning of the quarter

| Traditional                          | Equity            | LHA  |
|--------------------------------------|-------------------|--|
| 60/40 Aggregate                      | 60% MSCI AC World | 40% Barclays Aggregate                                     |
| 60/40 Long G/C                       | 60% MSCI AC World | 40% Barclays Long Government/Credit                        |
| Level 2                              |                   |  |
| Level 2: 40% Equities / 90% IR Hedge | 40% MSCI AC World | 33% Barclays Long Credit A-AAA, 27% Treasuries and Futures |
